<p>(54) <b>Title</b> COMMUNICATION METHOD AND DEVICE</p> <p>No Image Available.</p>		
<p>(57) <b>Abstract</b></p>		
<p>The invention concerns a communication method comprising an operation which consists in receiving a series of pages coming from a first site of a computer network. Said method further comprises an operation which consists in storing data representing said succession of pages, outside said first site, and an operation which consists in associating a certificate of integrity with the stored data representing said succession of pages. The certificate of integrity is stored in association with the data representing said succession of pages. The certificate of integrity enables to detect any modification of the stored data representing said succession of pages, subsequently to its being stored.</p>
